

INDEPENDENT BOUNDED WORKSTREAM

Before or beside professional work.

RGRA addresses the record-position gap before or beside project controls, claims, legal, audit, assurance, handover or programme action - never in place of the partner's professional authority.

THE GAP

The records exist, but the next professional action cannot yet rely on one supportable current position.

RGRA WORKSTREAM

A fixed-scope Decision-Basis Review and a bounded written outcome for the agreed matter, cut-off and purpose.

PARTNER AUTHORITY

The partner retains its opinion, advice, standards, client relationship and broader workstream authority.

Where it can fit

REFERRAL

RGRA contracts directly with the client. Any referral arrangement is agreed separately before work begins.

NAMED WORKSTREAM

RGRA is identified as an independent bounded workstream inside a broader engagement.

SUBCONTRACT

Permitted only with written scope, independence, confidentiality, payment and reliance terms.

BOUNDARIES

Any referral, subcontracting, white-label or other commercial arrangement is agreed separately before work begins. RGRA does not replace the partner's legal, claims, audit, assurance, project-controls or handover authority.

NEXT STEP

Request a partner discussion or send a short written background.
